The lowa Department of Transportation would like to thank all enforcement agencies and peace officers for their work on crash investigations which make this report possible. All information concerning lowa traffic crashes was taken from report forms provided by investigating officers and drivers involved in crashes.

All statistics are gathered and calculated by the Iowa Department of Transportation's Office of Driver Services. National statistics are obtained from "Traffic Safety Facts 1999" published by the U.S. Department of Transportation's National Highway Traffic Safety Administration. Population numbers are obtained from the U.S. Bureau of Census as prepared by the State Library of Iowa, State Data Center Program.

This publication provides information to safety professionals and other concerned citizens to promote a safer driving environment. We hope that this year's publication of **lowa Crash Facts** provides the information you need.

NOTE:

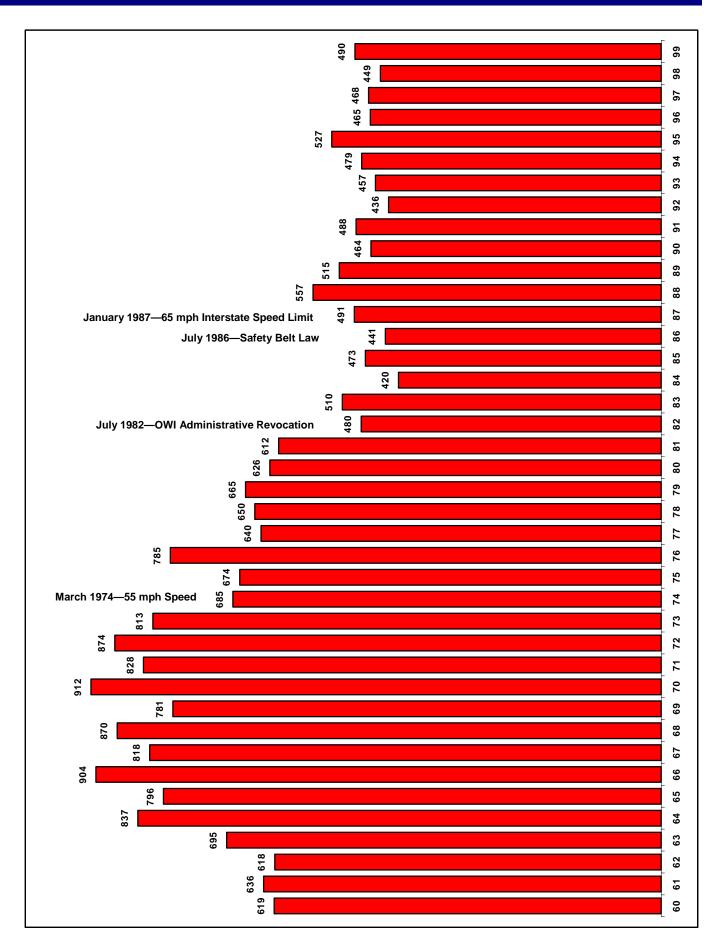

All crash figures for 1976, except for fatal crashes, are estimated because of missing data.

Beginning in 1978, motor vehicle registrations excludes official vehicles, travel trailers, miscellane ous vehicles and trucks licensed to more than one state.

Beginning with 1979, figures for fatalities and fatal crashes are based on persons who died within 30 days of the crash.

Beginning in 1987, the drop in number of licensed drivers is due to more accurate methods of computation and multiple licenses only counted once.

Alcohol-Related Motor Vehicle/Pedestrian Crashes

Alcohol-related crashes are more apt to occur—and more likely to be reported—in fatal crashes than in nonfatal crashes. In lowa, drivers who are involved in fatal crashes are not required by law to submit to an alcohol test; therefore, lowa alcohol-related crash statistics should not be compared to states where an alcohol test is mandatory. Testing for alcohol is based on probable cause as determined by the investigating officer. More than one driver may be tested for alcohol use in any particular crash. Care should be used in comparing the yearly percentages of alcohol-related fatal crashes due to fluctuations in the number of reports received.

An alcohol-related crash is where one or more drivers/pedestrians have a blood alcohol content (BAC) of .01% or higher. Therefore, a driver or pedestrian with a BAC between .000% and .009% is counted as *not drinking*, a driver or pedestrian with a BAC between .01% and .09% is counted as *drinking*, *not impaired*, and a driver or pedestrian with a BAC .1% and higher is counted as *drinking*, *impaired*.

Alcohol-related crashes are more apt to occur—and more likely to be reported—in fatal crashes than in nonfatal crashes. In lowa, drivers who are involved in fatal crashes are not required by law to submit to an alcohol test; therefore, lowa alcohol-related crash statistics should not be compared to states where an alcohol test is mandatory. Testing for alcohol is based on probable cause as determined by the investigating officer. More than one driver may be tested for alcohol use in any particular crash. Care should be used in comparing the yearly percentages of alcohol-related fatal crashes due to fluctuations in the number of reports received.

An alcohol-related crash is where one or more drivers/pedestrians have a blood alcohol content (BAC) of .01% or higher. Therefore, a driver or pedestrian with a BAC between .000% and .009% is counted as *not drinking*, a driver or pedestrian with a BAC between .01% and .09% is counted as *drinking*, *not impaired*, and a driver or pedestrian with a BAC .1% and higher is counted as *drinking*, *impaired*.

Holiday periods list the number of full days. Fatalities occurring from 6 p.m. to midnight on the previous day are also included. Regular weekend periods are from 6 p.m. Friday to midnight Sunday.

Beginning in 1978 the number of alcohol-related traffic fatalities for a given holiday is included, as well as the total number of holiday fatalities.

Beginning in 1981 the number of days included in a holiday period has been standardized as follows:

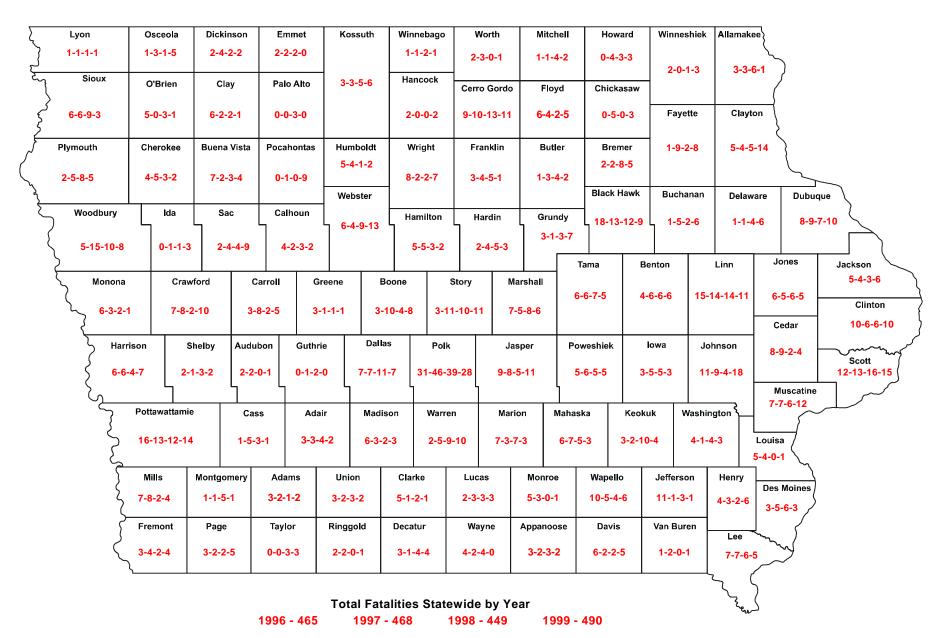

- 1 day if a holiday falls on a Wednesday
- 3 days if a holiday falls on Friday through Monday
